

PROFILE

Product manager who turns ambiguous 0→1 problems into validated, buildable systems — grounded in how users behave, not what they claim. Founder of Khabar, a live market-intelligence platform (**1M+ price observations** across ~23 Egyptian fashion brands), and founding PM at an agency where I took an abstract concept to a development-ready product. Research-before-build, AI-assisted delivery, comfortable driving product from discovery through engineering.

EXPERIENCE

- Founder & Product Lead · Khabar

Jun 2026 – Present

 - Took a market-intelligence product 0→1 as non-technical founder: defined the problem, built the full data taxonomy, and directed AI-assisted development to **1M+ price observations** across ~23 brands (95–96% cross-brand normalisation).
 - Ran discovery and competitor analysis on measured behaviour, not advertised claims — surfaced **62% inflated discounts** and **36.6% dead inventory**; linked demand signals to Egypt’s textile overproduction.
 - Operate a live human-in-the-loop pipeline at near-zero cost.
- Founding Product Manager · Dilogic (services agency)

Apr 2025 – Mar 2026

 - First hire, ahead of engineering: translated a founder’s abstract concept into product requirements, system logic, and a roadmap of PMF milestones — from zero documentation to a buildable multi-sided platform.
 - Mapped every platform actor and incentive, stress-tested for logical gaps, then drove hi-fi Figma MVP designs through engineering; challenged founder proposals that broke the system.
 - Built a metrics-based validation plan (GA4, PostHog) tied to the business model.
 - As Growth PM for client ArabFinance, lifted daily ad revenue from **~2 to 400+ EGP**; disproved the board’s assumed root cause with Microsoft Clarity + GA4 (real issue — journey/page mismatch with visitor needs).
- Co-Founder & Product Discovery · Insta-Hired

Oct 2024 – Jan 2025

 - Co-founded a bilingual job-matching venture; ran four rounds of user validation and shipped **three MVPs in four months for under \$50 (100% referral rate)**.
 - Secured an employer letter of intent before external structural barriers forced a pause.
- Convergence Sales Specialist · Vodafone

Jan 2024 – Oct 2024

 - Closed **200+ consultative sales** at >85% call quality, zero complaints — diagnosing the real need before matching an offer.
- AI Data Trainer · DataAnnotation.tech

Dec 2025 – Present

 - Evaluate and refine AI-model outputs against accuracy and quality criteria (full-time since Apr 2026).
- UX Researcher (Freelance) · Independent

2022

 - Interviews and usability testing for a client; first structured research step out of literary analysis.

EDUCATION

BA, French Language & Literature · Faculty of Al-Alsun — 83% (“Very Good”)

2019 – 2023

SKILLS

Product Discovery & 0→1 · Market / competitor research · Requirements, specs & roadmapping · Product validation · Cross-functional delivery (design ↔ engineering)

Research & Data User research (qual & quant) · Metrics-based validation (GA4, PostHog, MS Clarity) · Data analysis · SQL · Excel · Data visualisation (Tableau)

Tools & Delivery Figma prototyping · AI-assisted / no-code development · Agile delivery

Communication Stakeholder management · Storytelling

CERTIFICATIONS

McKinsey Forward · Google UX Design (Coursera) · UX Research Nanodegree (Udacity) · Design Thinking (UVA Darden) · Prototyping for Digital Experiences (IDEO U) · Business Analyst (365 Data Science)
